

Do you suffer from **asthma**  
or **chronic obstructive  
pulmonary disease (COPD)**?

This GP practice is taking part in an important national project to improve the care for people with asthma and COPD. The project is called the National Asthma and COPD Audit Programme (NACAP).

If you have **asthma** or **COPD**, your GP practice will share information about your care and treatment with NACAP. Strict rules are in place to make sure your information remains **safe** and **secure**.

For more information about the audit and how your information is used, please ask a member of staff for a patient information leaflet.
